**ANDERSON™**  
FEED TECHNOLOGY  
*powered by Ottevanger*

## General

Anderson Feed Technology offers a range of expanders which improve the quality of finished feed and allow for a more efficient process flow.

The Anderson Contivar expanders have a reliable and sturdy design and are equipped with a unique Active Disk system (AD-system) in order to control exact product output and assure the quality of the product.

The AD-system is easy to control and designed for ease of maintenance.

The robust and simple design of the Anderson Contivar guarantees years of trouble free and economical production.

## Features

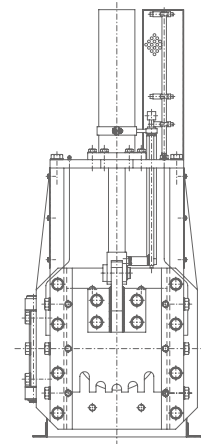

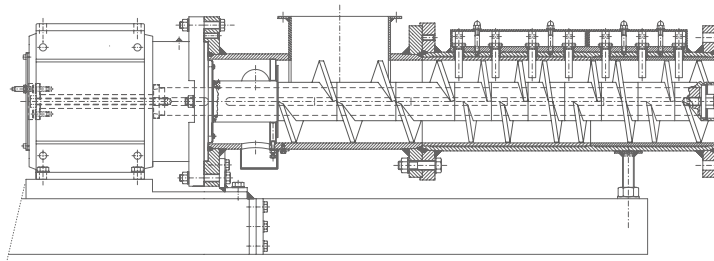

- Eliminate heat sensitive bacteria (salmonella)
- Addition of higher fat and liquid inclusions
- Gelatinization of available starches
- Improved end product durability and strength
- Increased output of pellet mill
- Reduces wear costs of pellet mill
- Improved water stability for fish feed
- Enhanced oil extraction
- Easy cleaning
- Less downtime for maintenance
- Low cost of wear parts

Feeder and insulated Conditioner with steam kit to be placed on top of the expander

Drive with combined gearbox-bearing assembly

Type	Main motor (Hp)	Motor slide adjustment (Motorpower Hp)	Barrel diameter (Inches)	Capacity (t/h)
AL150	75 - 125	1	6	1 - 6
AL200	125 - 180	1	8	5 - 10
AL300	180 - 430	1 ½	12	10 - 30
AL350	430 - 545	1 ½	14	30 - 45
